

UHN Bariatric Surgery/Critical Care Consultation-Liaison Psychiatry Fellowship

Fostering Excellence and Leadership in Complex Care at the Interface between Medicine, Surgery, and Psychiatry.

One year Clinical Fellowship

The University Health Network (UHN) Consultation-Liaison (CL) psychiatry fellowship offers an opportunity to learn about and participate in the care of complex medically ill patients within a diverse and rich clinical and academic environment. We are an academic health sciences centre comprised of four hospitals and are affiliated with the University of Toronto. Our clinician-teachers, education scholars and researchers are dedicated to fostering academic careers in consultation-liaison psychiatry

Ambulatory and Inpatient Experiences

The fellowship consists of participation in the Bariatric Surgery Psychosocial Program at Toronto Western Hospital as well as the inpatient transplant/medical-surgical intensive care unit (MSICU) consultation-liaison psychiatry service at the Toronto General Hospital. Along with clinical care in both ambulatory and inpatient settings, fellows will also engage in scholarly activity in consultation-liaison psychiatry.

Kindly submit your applications to Tammy.Cadue@uhn.ca, by February 14th, 2014.
